Planned

Complete (bar shaded to % done)

Status date

Dur = workdays (weekends excluded). Pred = task # that must finish first. Write the start date of each column in the header — weekly for a 4-month job, every 2 weeks for 8 months.

Planning document, not a contract schedule. Contract time, milestone dates and notice requirements come from your subcontract — update this schedule when a change order adjusts them, and record delays in your daily report the day they happen.
